2025 COLLECTION

What is Alumverde™

ALumverde is a concept, a technique, a system and a vision.

A Vision to Get Back to Nature

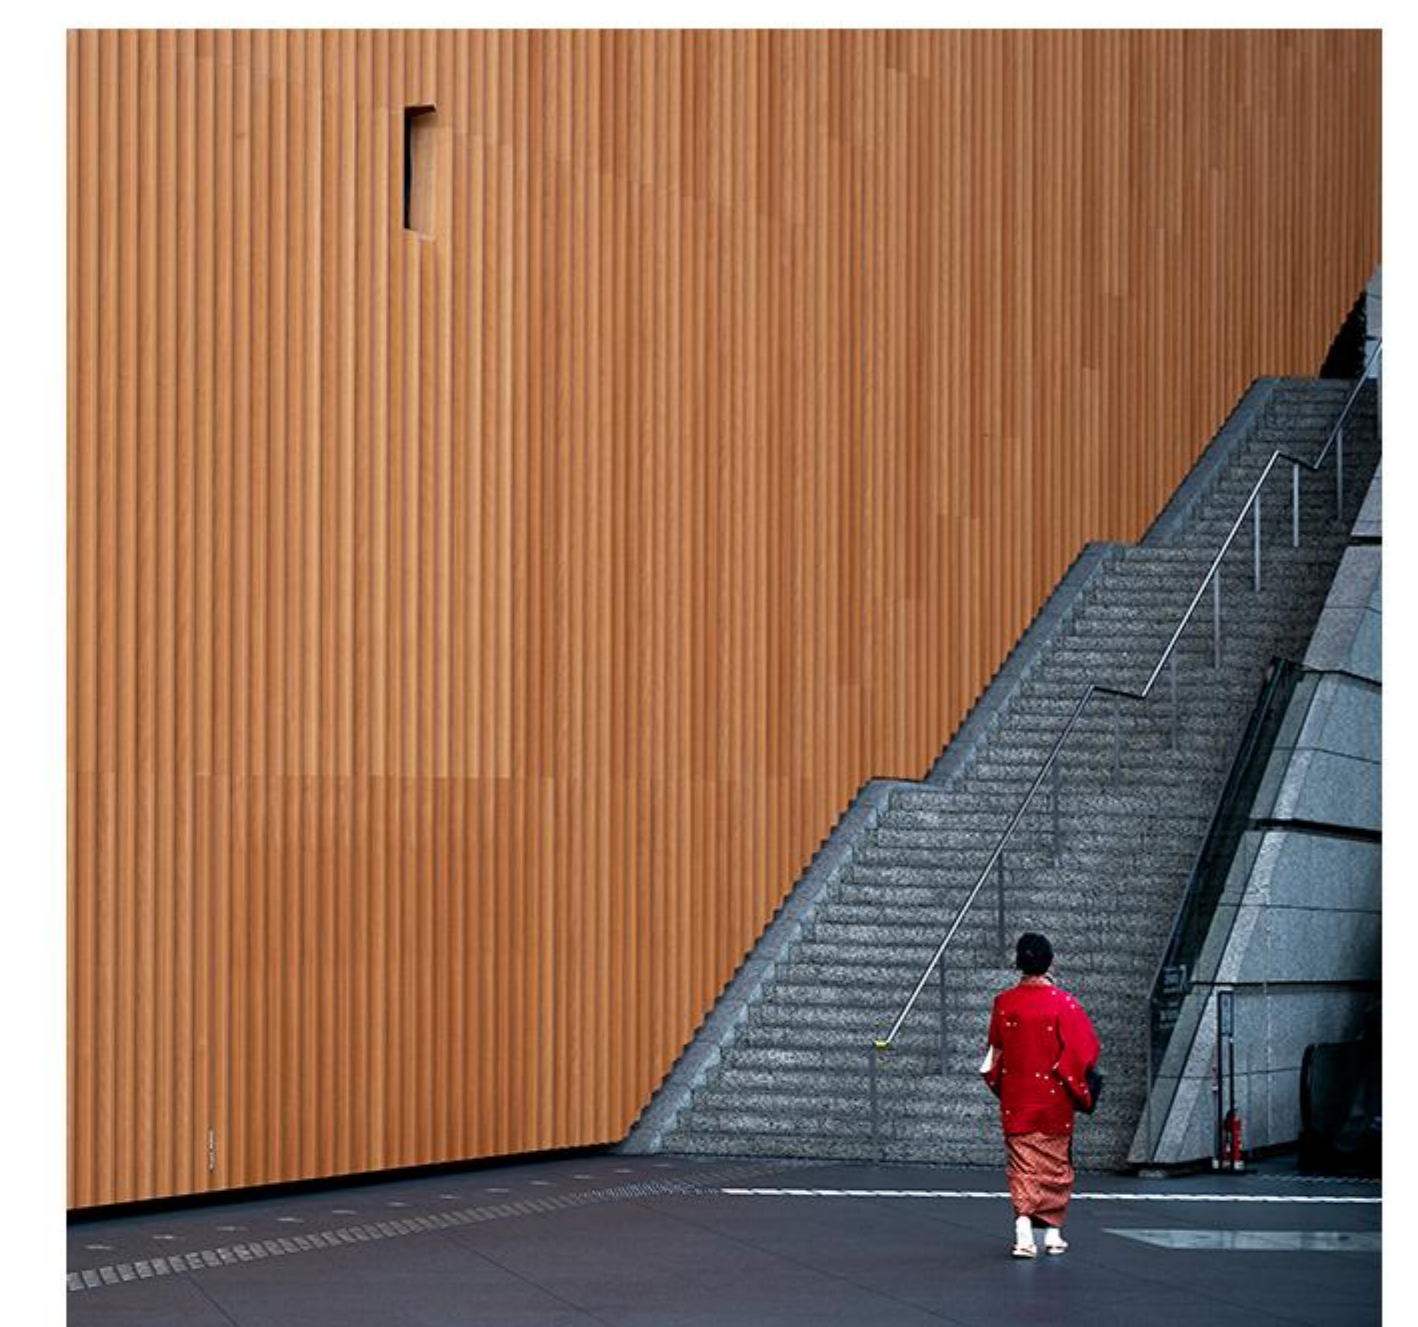

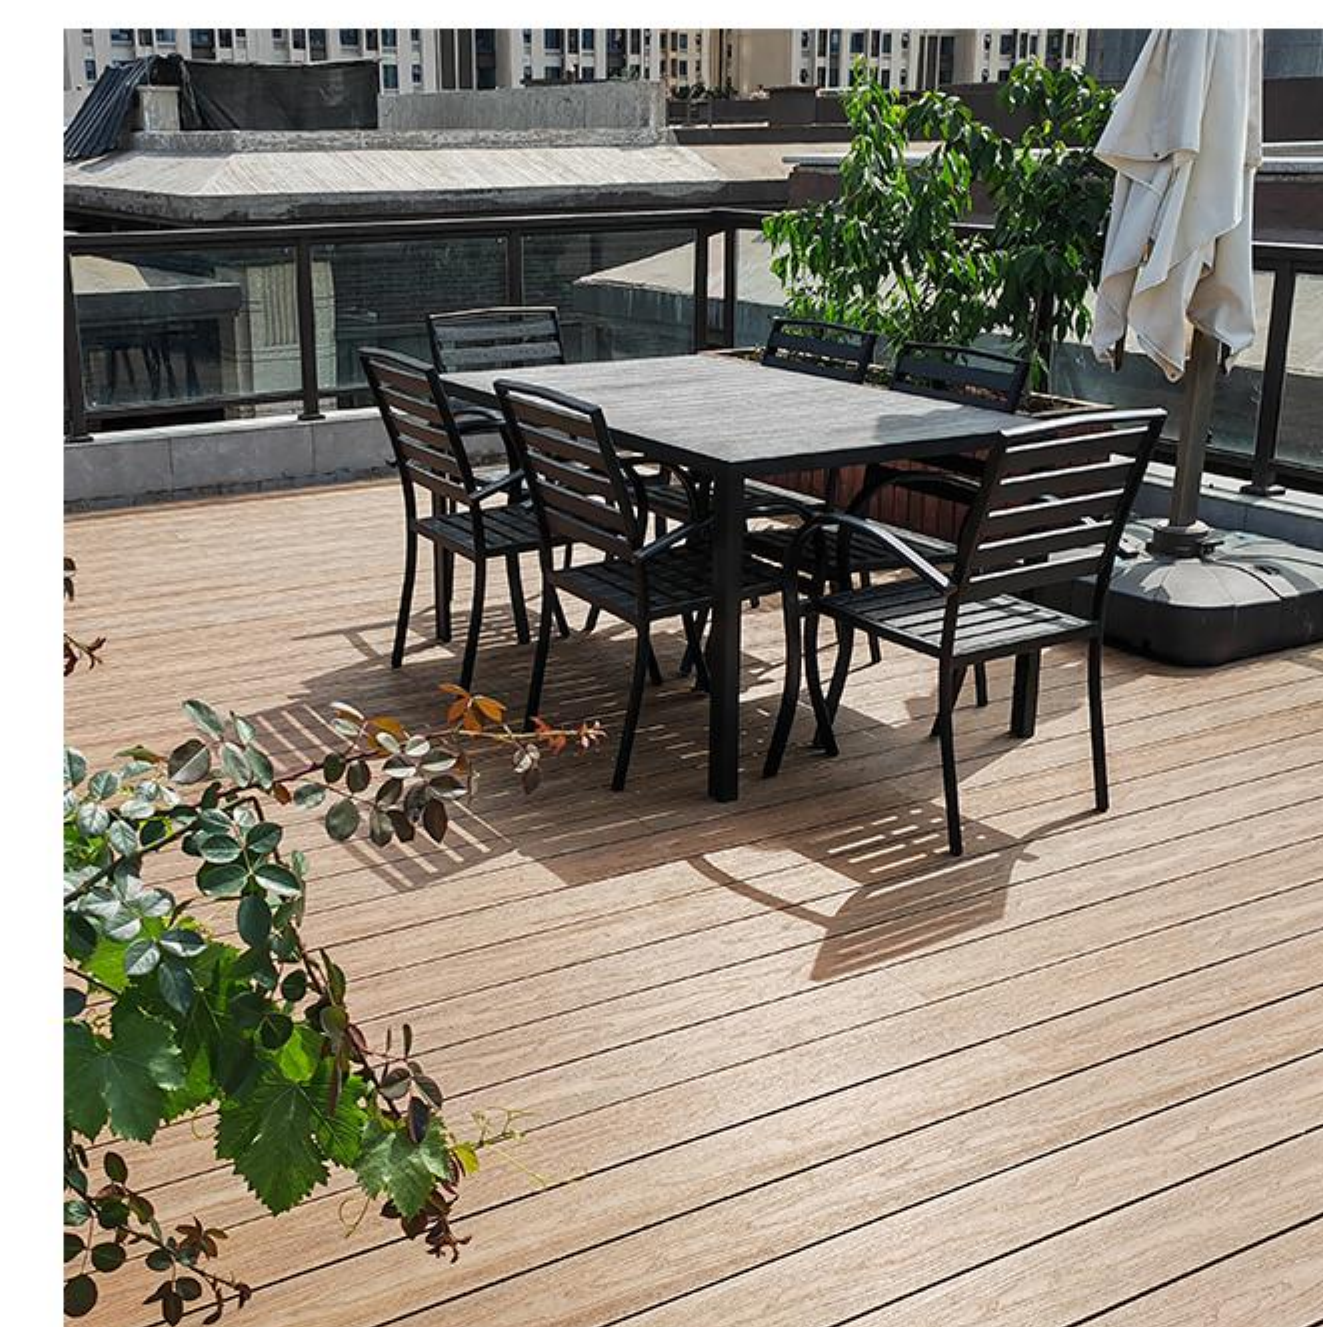

ALumverde™ is originated from aluminum core- 'Alum', and the eco vision of back to nature -'verde'.

With our best wish to keep the outstanding performance of outdoor aluminum decoration material, we hope to bring an aesthetic revolution with the life-like wood feeling beyond aluminum.

Choose ALumverde™ to transform your projects into enduring masterpieces —where the strength of aluminum meets the warmth of nature, and innovation builds a greener tomorrow.

SURLYN RESIN- BLENDING TECHNIQUE

ALumverde uses hybrid of Aluminum Core and Surlyn Resin, with green composite adhesive as inter layer to make it a long-lasting product for high performance.

Life-like Feeling

The intricate details of real wood, delivering an authentic and refined aesthetic.

Class A Fire Rated

High fire resistance standard to embrace safety compliance

Low Heat Conduction

30% less heat in outdoor use gives a more comfortable experience walking under burning sun.

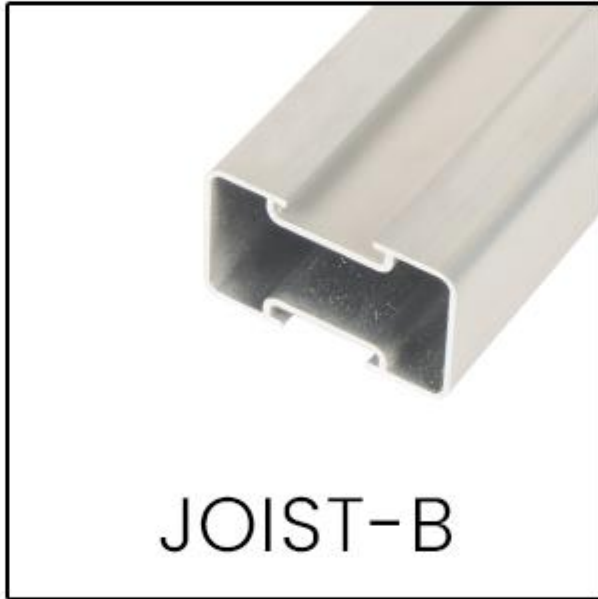

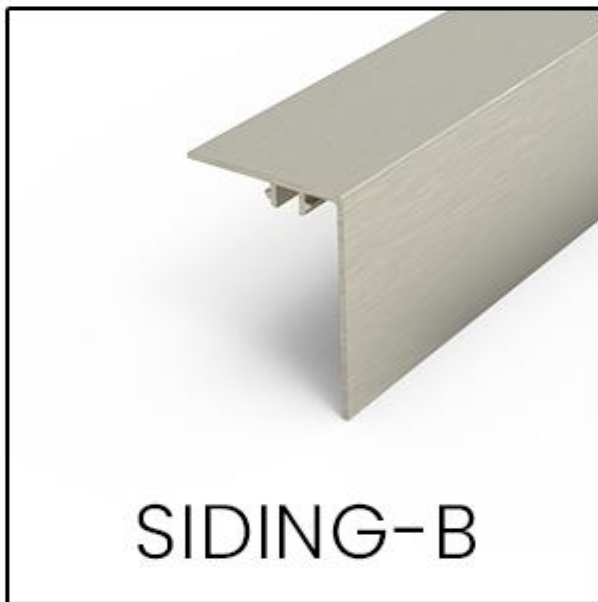

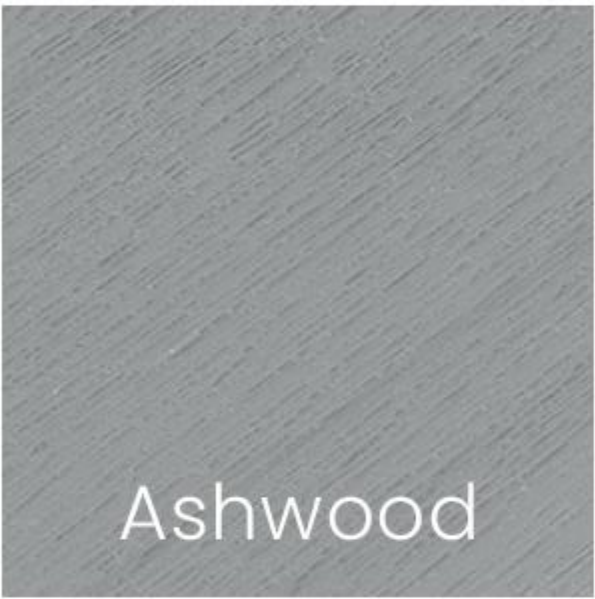

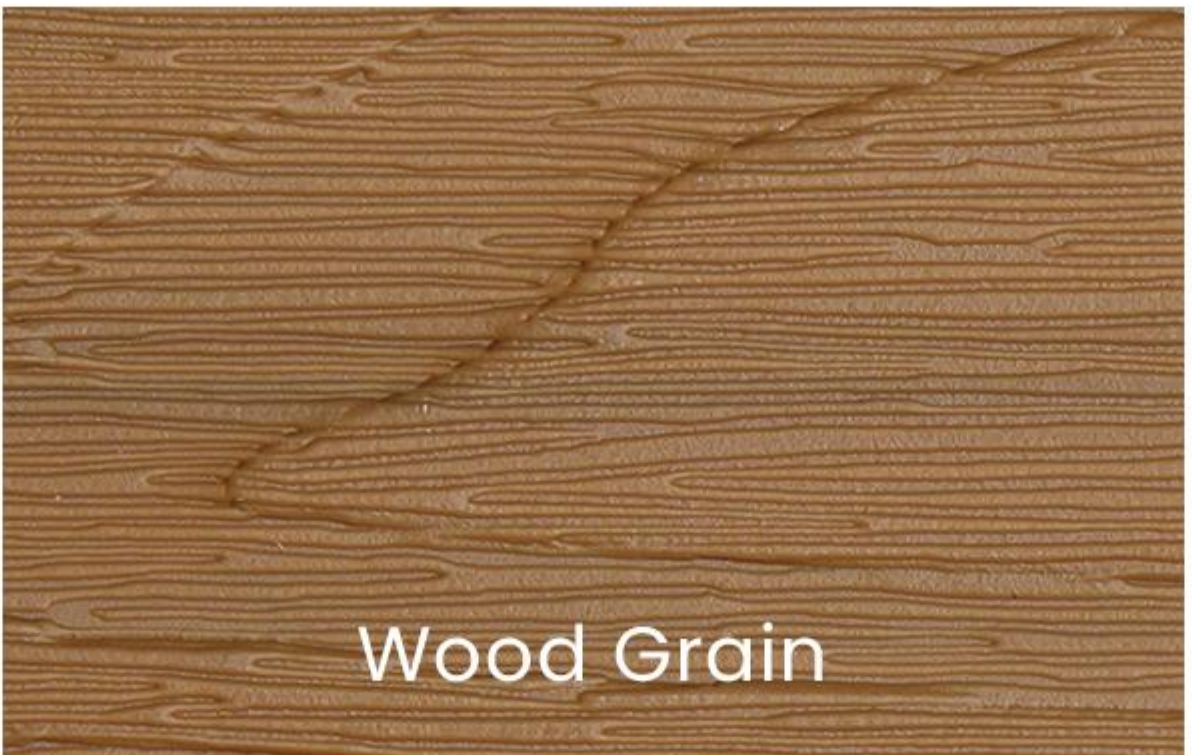

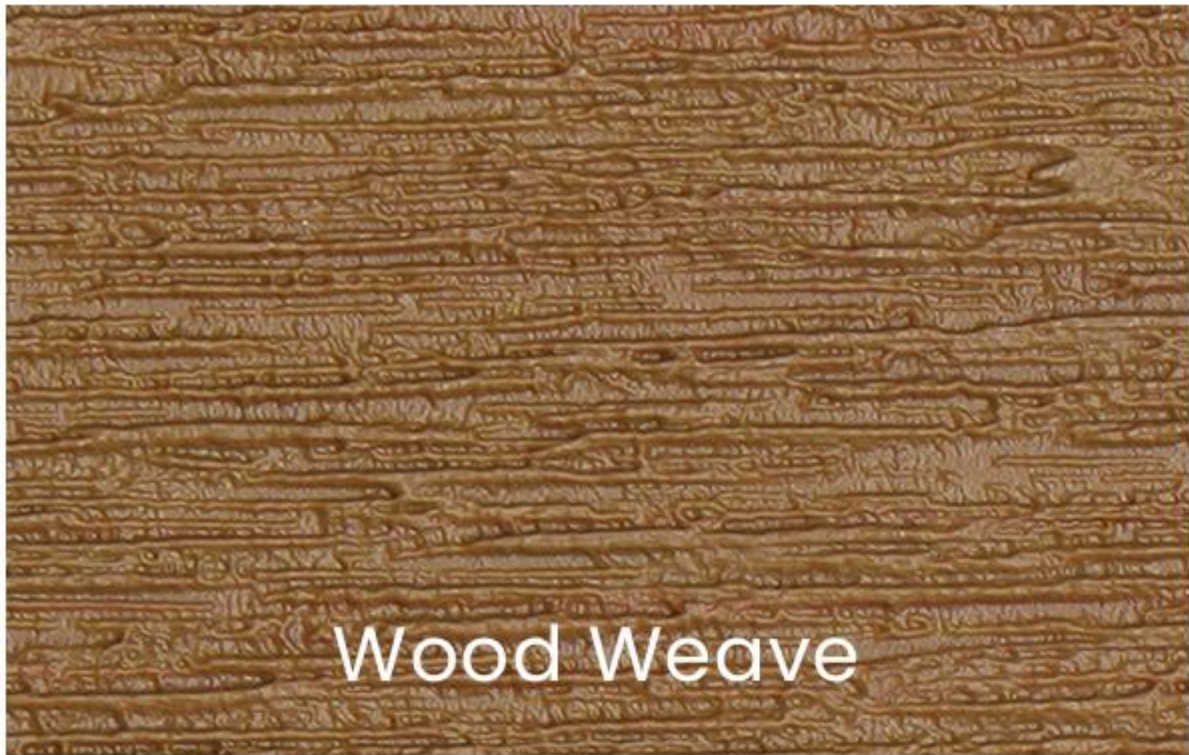

DECKING

Beyond Aluminum-A Touch of Wood, A Vision of Art

LuxeFlow Decking™

Non-combustible aluminum decking with in-built drainage channels

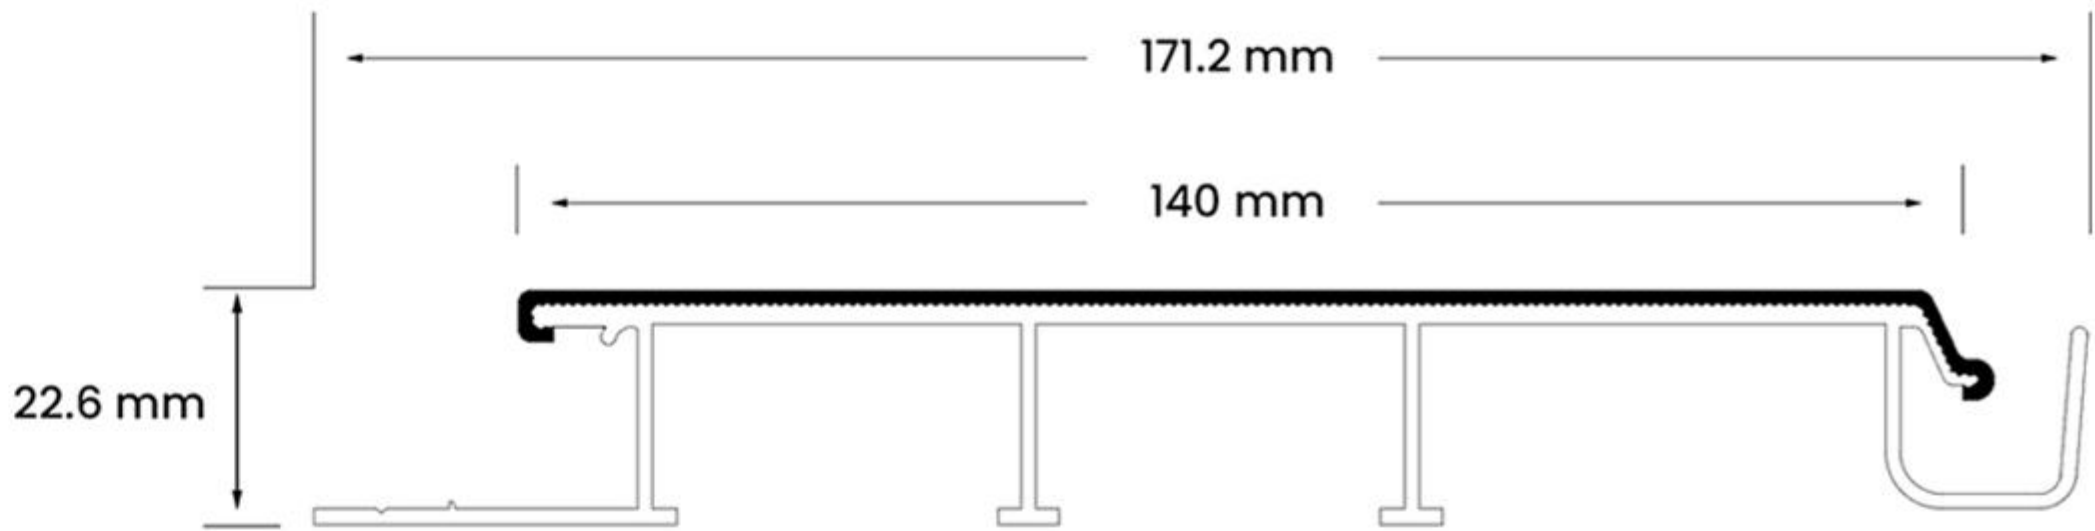

LuxeFlow decking brings a new collection of premium design and aesthetic. It features an innovative design that combines seamless water gathering and drainage with the enduring natural beauty of real wood, all built around a durable aluminum core for long-lasting performance.

Dimensions: 6 3/4" x 9/10" | 171.2 mm x 22.6 mm

Usable Width: 5 1/2" | 140mm

Weight: 1.04 lbs/ft | 1.55kg/m

Non-Combustible Decking

Say good bye to the cold of metal
Embrace the warmth experience from LuxFlow Decking.

Inspired by nature, our woodweave texture beautifully replicates the intricate details of real wood, delivering an authentic and refined aesthetic.

LUXEFLOW DECKING COLOR: TEAK ▲

Full system of drainage channel guides the water in a proper way to prevent water leakage.

The decking edge as channel, gathers the water from surface and flow through channel. Designer can choose to use our match gutter to guide its way to the drainage point. For the whole process, the water is managed in a proper way from falling to the lower structure.

NATURE'S ARTISTRY CAPTURED IN METAL

Through advanced co-extrusion technology, a dynamic 3D grain pattern is layered onto the 6063-T5 aluminum core –mimicking the organic ridges, subtle shadows, and multi-tonal hues of natural timber.

Remarkable Stability

With ultra-low water absorption and minimal expansion, Alumverde tubes can extend up to 6 meters, offering exceptional stability for use in high-rise buildings.

Class A Fire Rated

High fire resistance standard to embrace safety compliance

Limitless Design

Offering a variety of sizes, shapes, and accessories, Alumverde Tube Solutions provide endless design possibilities

◀ TUBE

TUBE

Fireproof core, Zero expansion.

Aluminum Tube

As ALumverde’s most variable profiles

It not only has square shape in over twenty sizes, but also the distinctive round, rhombus shape. All of them can be transformed into unique design, or blend in your current product with beauty.

AC-ST01

Dimensions: 1" x 3/5" | 25 mm x 15mm
Weight: 0.16lbs/ft | 0.24kg/m

AC-ST02

Dimensions: 1 31/32" x 1 1/5" | 50 mm x 30mm
Weight: 0.45lbs/ft | 0.68kg/m

AC-ST03

Dimensions: 2 2/5" x 1 31/32" | 60 mm x 50mm
Weight: 0.62lbs/ft | 0.92kg/m

AC-ST04

Dimensions: 3 3/20" x 1 9/16" | 80 mm x 40mm
Weight: 0.64lbs/ft | 0.95kg/m

AC-ST05

Dimensions: 4 4/5" x 1 1/5" | 120 mm x 30mm
Weight: 0.84lbs/ft | 1.25kg/m

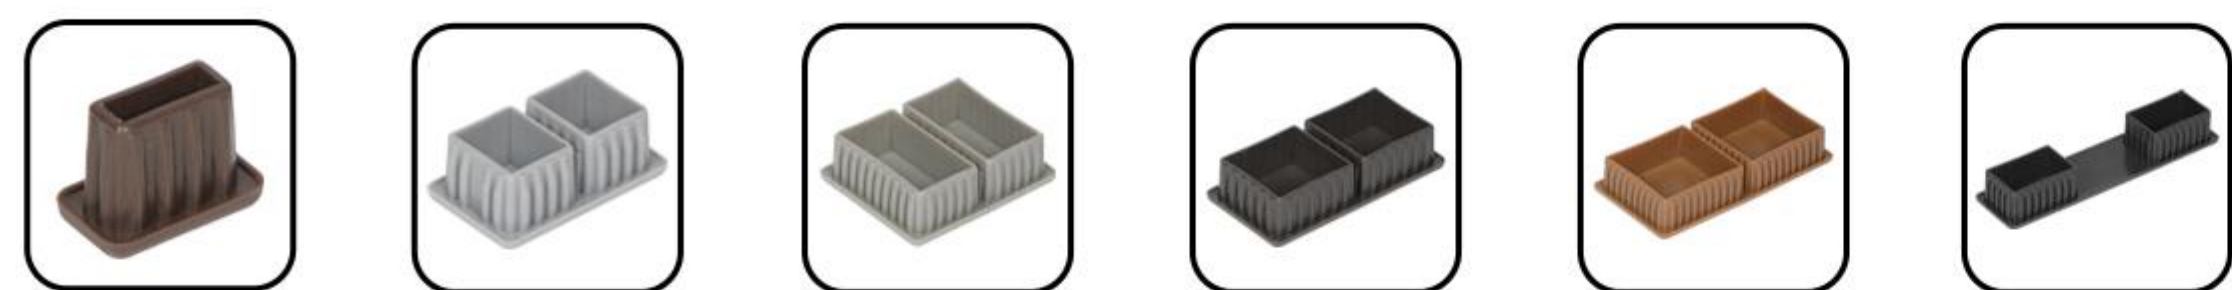

AC-ST06

Dimensions: 3 15/16" x 1 31/32" | 100 mm x 50mm
Weight: 1lbs/ft | 1.49kg/m

Redesigned for Simplicity

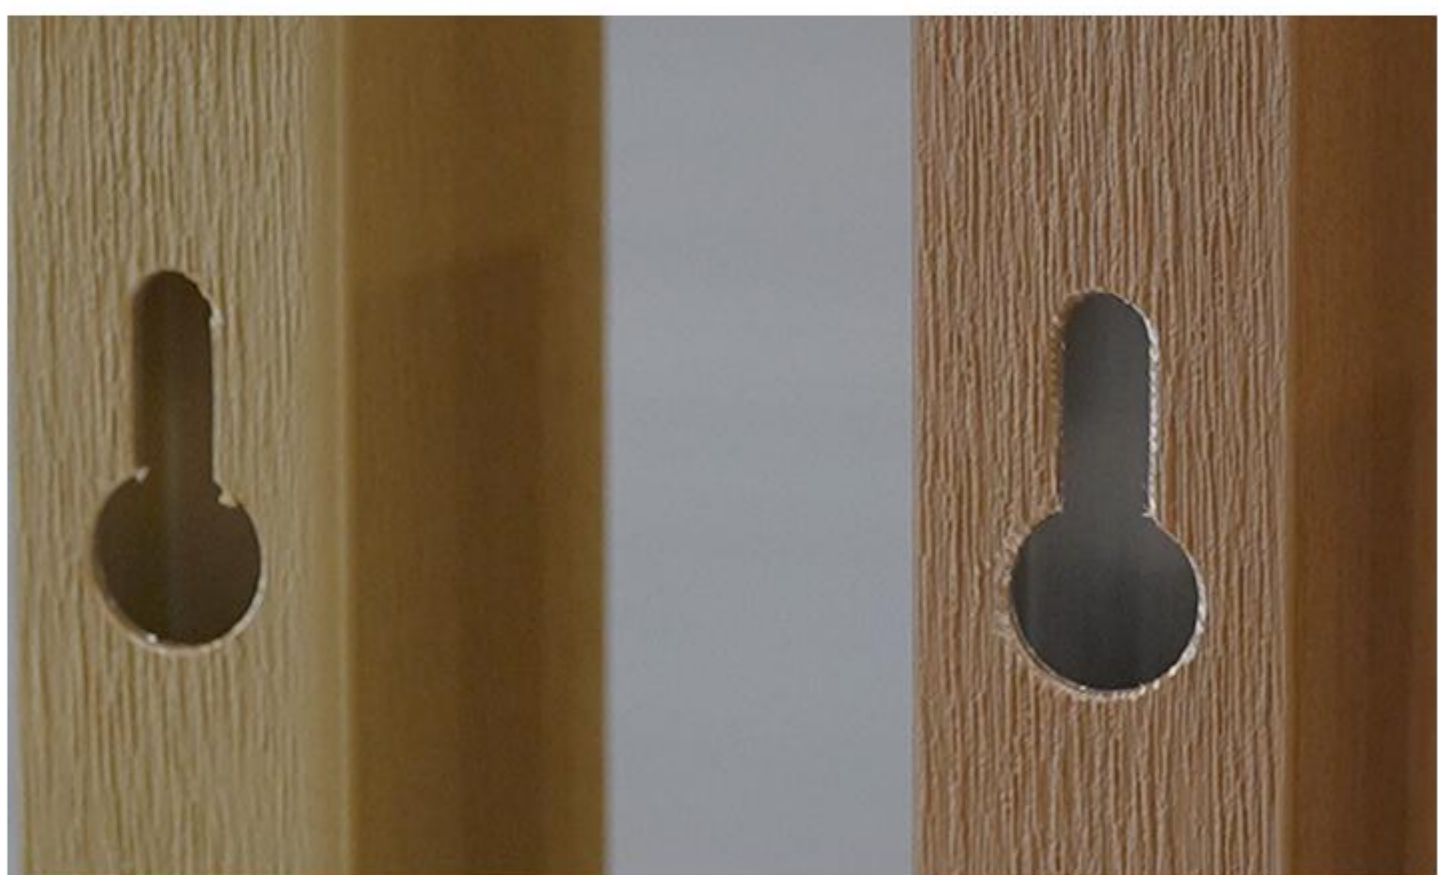

Precision components, effortless installation

The upgraded installation system delivers speed and efficiency, reducing labor without compromise.

Modular System

Custom-fit caps for every profile—combining flawless aesthetics with water resistance.

One-Step Wall System

Pre-punched profiles + modular frames
= full-wall installation in minutes.
Minimal tools. Maximum efficiency.

MAKE TO ENDURE BETTER STABILITY

High-rise building requires a balance between stronger structure and light weight. Double structure is our solution for better stability.

Double Strength

Our innovative double-structure design enhances strength and durability, making it ideal for high-rise applications.

Class A Fire Rated

High fire resistance standard to embrace safety compliance

Advanced Heat Insulation

effectively reducing heat penetration and improving energy efficiency.

◀ CLADDING

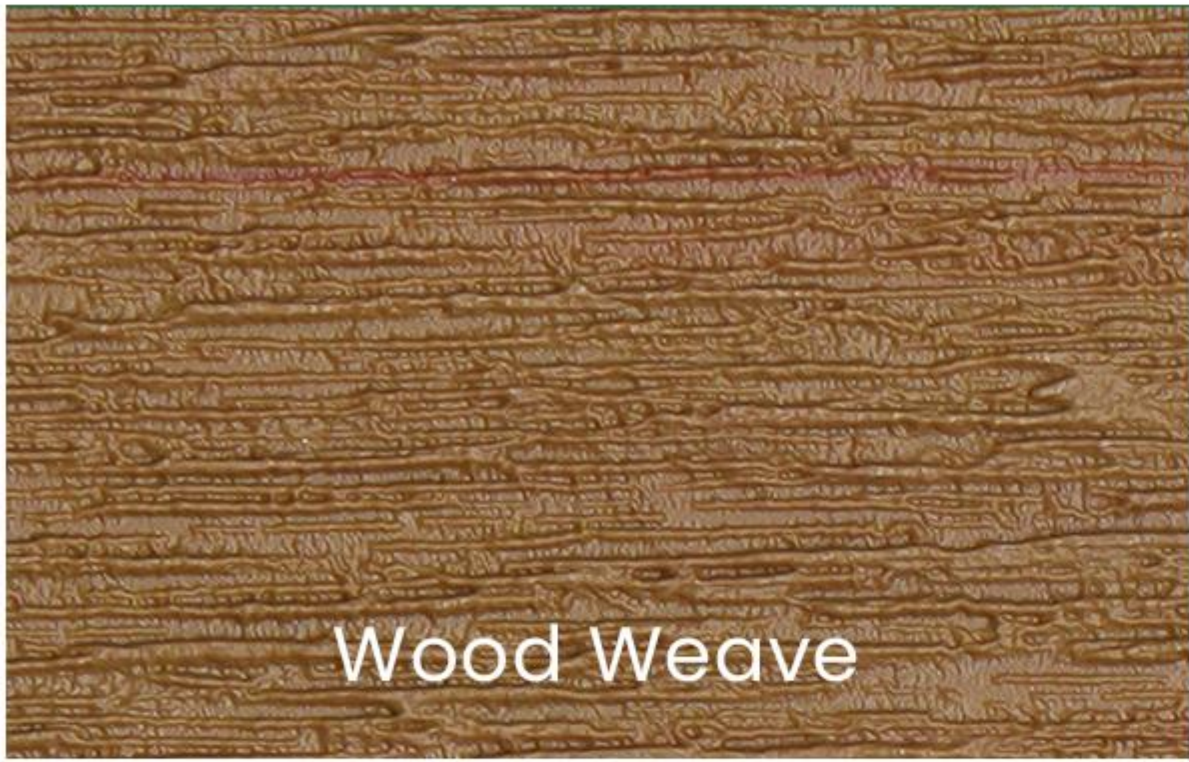

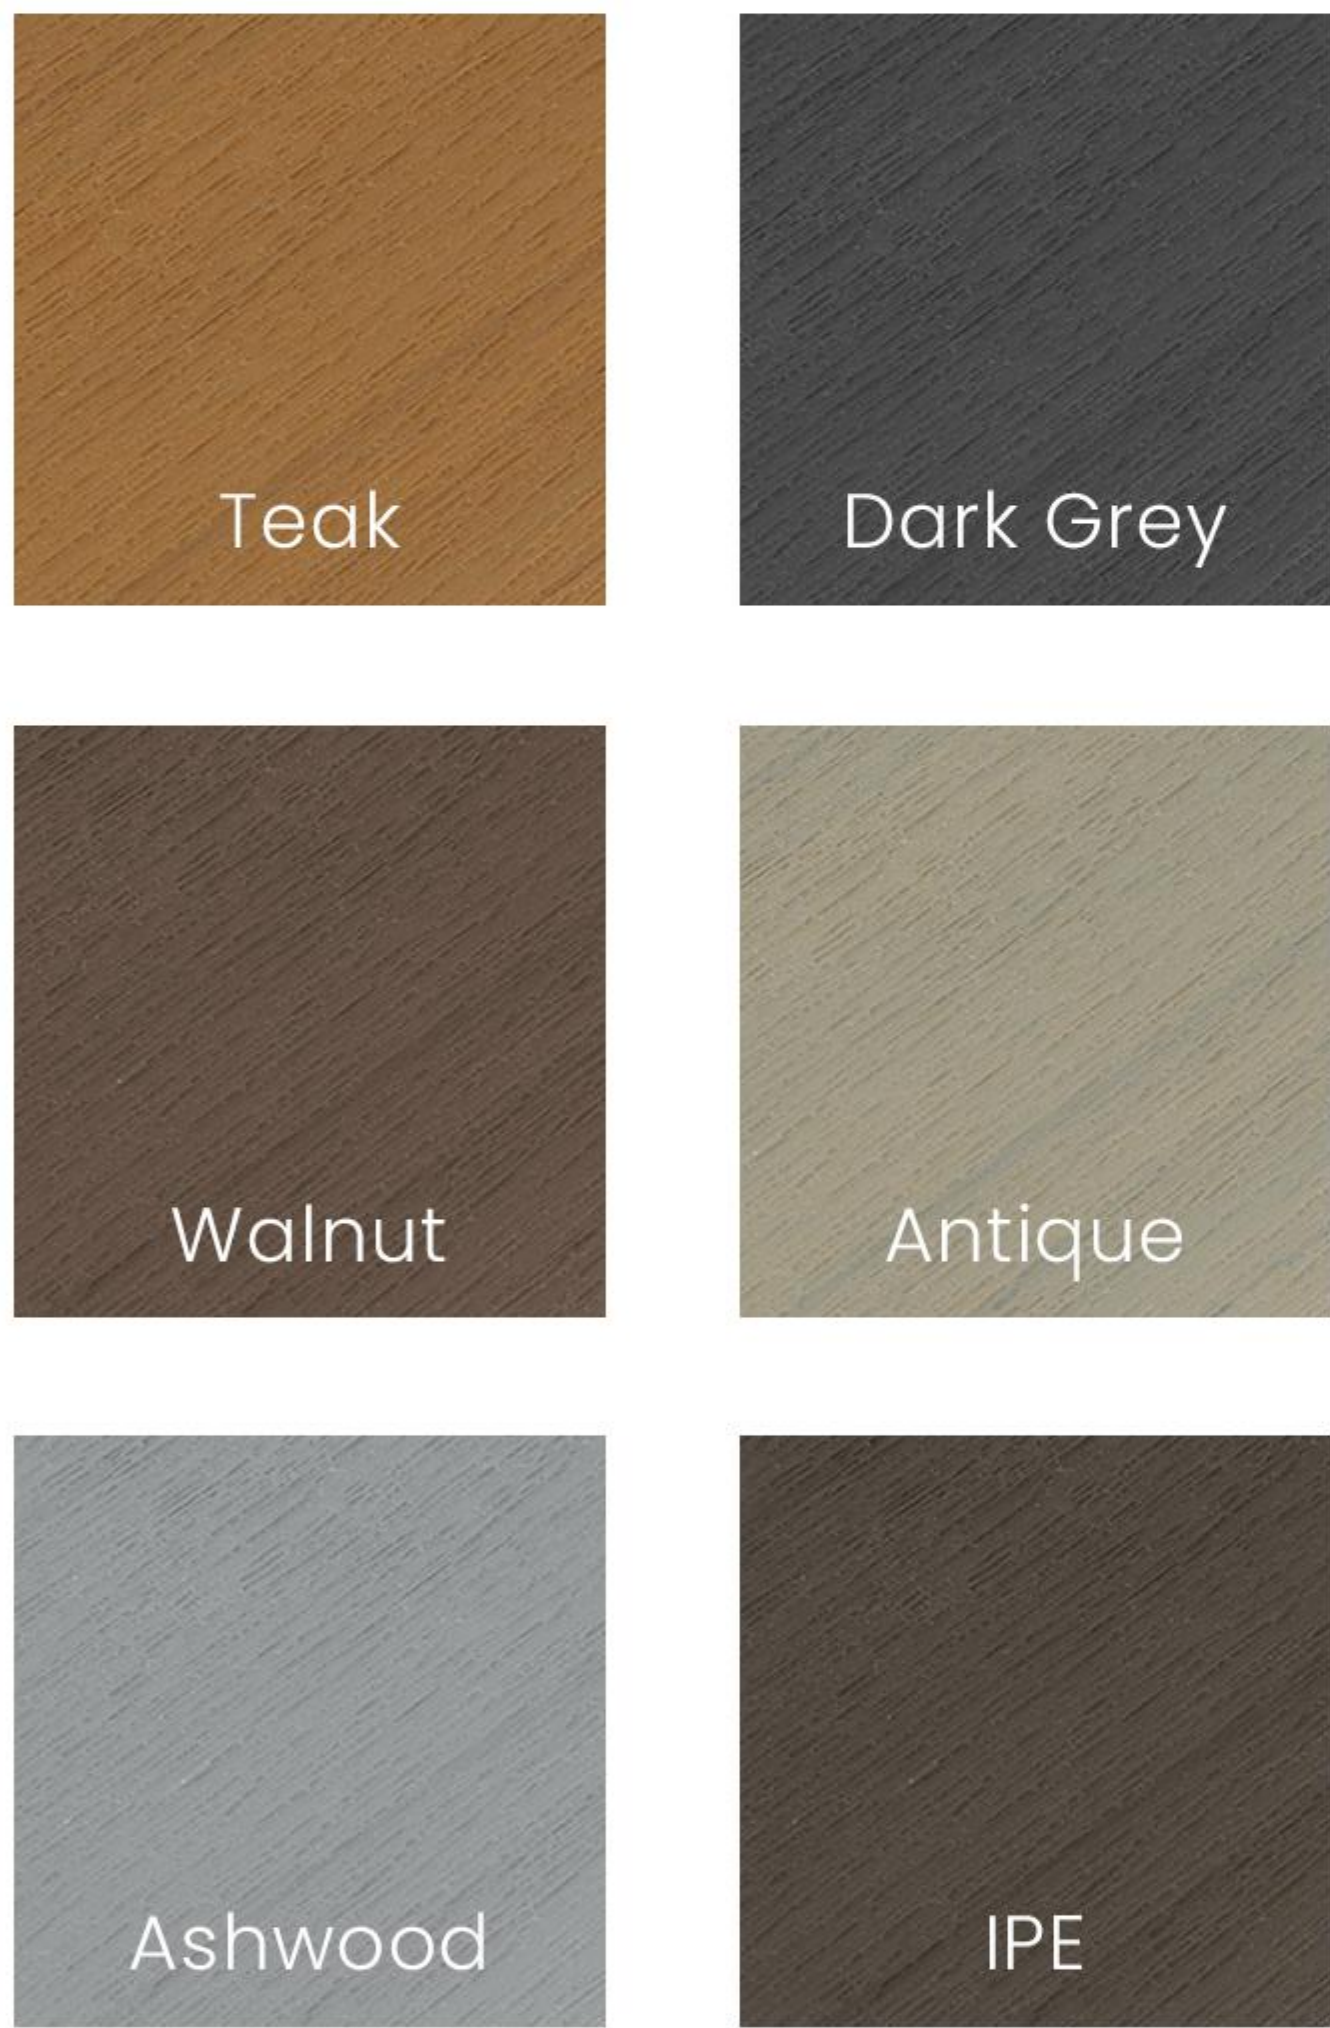

CLADDING

Redefining metal with a life-like wood finish.

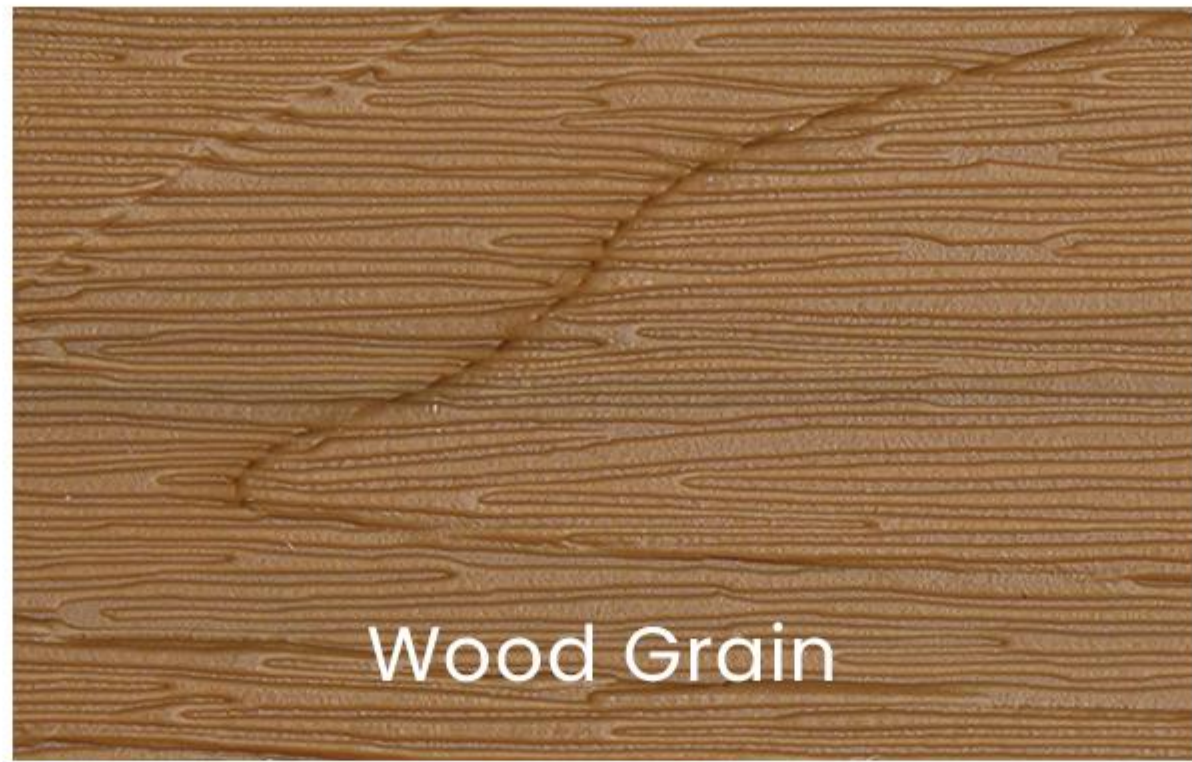

Alumverde Cladding

Alumverde Safety-Based Wood-Feeling Facade Solutions

Featuring our signature double-structure design, they offer the authentic texture and feel of natural wood on one side, while delivering the superior benefits of durability, lightweight construction, rapid installation, and recyclability on the other.
